

PROFESSIONAL COATING EQUIPMENT SPECIALIST

SPRAY GUNS & ACCESSORIES FOR CAR REFINISH

PRODUCT LIST 2017

WHO IS ANEST IWATA?

The ANEST IWATA group, founded by Iwata Seisakusho in 1926, is a leading global manufacturer in the sector of coating technology with over 1.300 employees around the world.

We offer high-quality coating technology for the application of spray materials in the fields of car refinish, woodworking and industrial paint finishing as well as airbrushing for all areas of individual application around the globe.

In addition to pumps and compressors, spray painting systems are among the most important products of the company.

The headquarters of the ANEST IWATA group are located in Japan. The newest products and leading technologies which are utilized around the world are developed in our technical centers in Japan.

WHAT DOES ANEST IWATA STAND FOR?

The ANEST IWATA group is a continually active corporation which is oriented toward steady development.

By consistently developing new products and leading innovations in technology, we always strive toward constant improvement and perfection.

The ANEST IWATA group is the innovator for employing the latest application processes.

WS-400 Evo Clear

FEATURES

- Perfect surfaces and finest atomization by Split Nozzle Technology
- High material transfer by a large and uniform spray pattern
- Very fine atomization
- VOC-compliant professional spray gun, significantly more than 65% efficiency
- Clearly visible reduction of so-called fat edges
- For ANEST IWATA-typical: quiet and pleasant background noise
- Anatomically lightweight spray gun body
- Simple operation of the control knobs, for right and left handers
- Conical seal nozzle, minimum wear parts
- Clearer design, easy maintenance
- Quality surface for an easy cleaning

PCG-6-PE
600ml Cup

PRO KIT

Carton Box

- W-400 WB | WBX
- PCG 6 PE CUP 600 ml
- Cleaning Brushes
- Universal Spanner

FEATURES

- Perfect surfaces and finest atomization by Split Nozzle Technology
- VOC-compliant professional spray gun, significantly more than 65% transfer efficiency
- Very fine atomization
- Ideal for blending
- For ANEST IWATA-typical: quiet and pleasant background noise
- With 380g one of the lightest guns on the market
- Conical seal nozzle, minimum wear parts
- Quality surface for an easy cleaning
- Clearer design, easy maintenance

600ml Cup

FEATURES

- Perfect surfaces by Split Nozzle Technology
- Specifically for blending, for example, side wall or bumper and smaller areas
- Barely visible transitions due to soft and fine spray
- Very fine atomization with low air consumption (190l/min)
- Extremely low material consumption
- For ANEST IWATA-typical: quiet and pleasant background noise
- With 320g one of the most lightweightest Smart Repair guns on the market
- Simple operation of the control knobs, for right and left handers
- Conical seal nozzle, minimum wear parts
- Clearer design, easy maintenance
- Quality surface for an easy cleaning

SMART REPAIR

Blending or hue adjustment, basecoat is painted over the damaged area and then completely painted with clearcoat, full coating of small parts such as wheel covers, mirror caps and spoilers

W-200 PRESSURE Series

W-200 PRESSURE Series

PREMIUM
Quality

HIGH
Quality

W-200 WB

FEATURES

- High speed operation while maintaining the same surface quality
- VOC-compliant professional spray gun, significantly more than 65% efficiency
- Large and uniform flat&thin spray pattern with fine atomization for large areas
- W-200 WB with Split Nozzle Technology
- W-200 with Round Nozzle
- For ANEST IWATA-typical: quiet and pleasant background noise
- With 380g one of the more lightweight pressure feed spray guns on the market
- Simple operation of the control knobs, for right and left handers
- Conical seal nozzle, minimum wear parts
- Clearer design, easy maintenance
- Quality surface for an easy cleaning
- Combinable with all ANEST IWATA diaphragm pumps and pressure tanks
- Available: fan pattern control for permanently switching and push-pull pattern adjustment set for fast briefly switching

W-400 Classic Plus

W-400 Classic Plus

HIGH Quality

Classic plus

FEATURES

- Universal spray gun for industrial coating
- VOC-compliant professional spray gun, significantly more than 65% transfer efficiency
- Large and uniformly shaped wet core, even with high viscosity materials
- Clearly noticeable reduction in banding
- 280 NI / min air consumption; also suitable for small compressors capacity
- For ANEST IWATA-typical: quiet and pleasant background noise
- With 380g one of the lightest guns on the market
- Conical seal nozzle, minimum wear parts
- Quality surface for an easy cleaning
- Clearer design, easy maintenance

DPS-120 & DPS-90 ACCESSORIES

Pump Unit

DDP-90F.TE

Pump Unit

DDP-120B.TE

FEATURES

- Double Diaphragm Paint Pumps in a compact and stylish designs are the perfect choice for the delivery of fluid media (solvent and water-based paints) to the supply of manual and automatic spray guns.
- Fully pneumatic pump control with Double Spool air circuit.
- The reliable pump motor combined with the Double Spool air circuit promises an excellent finish. (Air pressure circuit conform to safety standard prEN12621).
- The pneumatic control system prevents the forced stoppage of the pump. Dead storage material channels and easily collapsible pump structure facilitate cleaning, inspection and maintenance.
- Wear-resistant pump assembly
- Available also with a 2-way connection (Aluminium & Stainless Steel models).

PET Series (max. 7.0 bar)

PET Series (max. 7.0 bar)

stainless steel

PET-50 | 50 lt.

PET-30 | 30 lt.

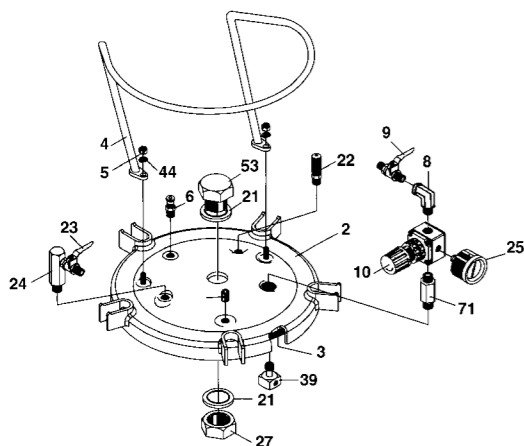

PET-10 | 10 lt.

Pneumatic Agitator - AM-6B

Operating pressure: 1±1.5 bar
 Air consumption: 15 Liter/min,
 Max. air inlet pressure: 7.0 bar

N: without Pneumatic Agitator

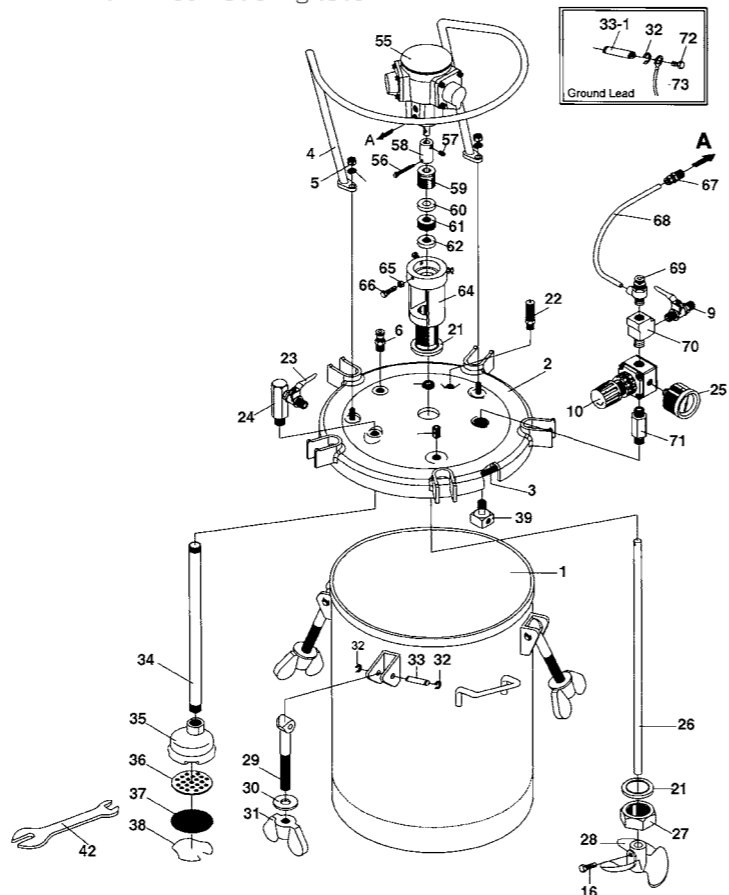

FEATURES

- Stainless steel container, polished inside
 - PET 10** (10 lt.), **PET 30** (30 lt.), **PET 50** (50 lt.)
 - N:** without pneumatic agitator
 - MN:** with pneumatic agitator
 - Second material connection (optional)
 - No additional lubrication of drive required
 - All models conform to ATEX
- Max. operating pressure: 7.0 bar
 - Air inlet joint: G 1/4"M
 - Fluid outlet joint: 3/8"M
 - Operating temperature: 5-40 °C

PET-10 (max. 4.0 bar)

PC-18 D (max. 3.5 bar)

FEATURES

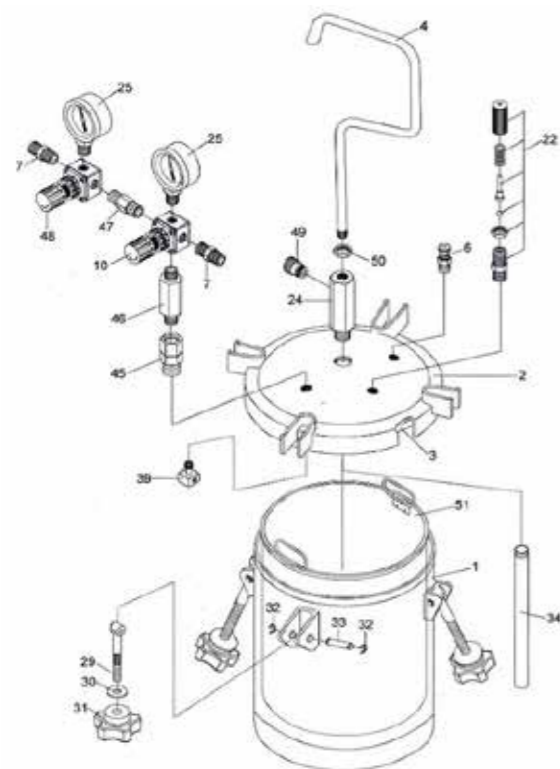

- Paint pressure tank with stainless steel inner tank for easy Filling of the appropriate material and a trouble-free interior cleaning
- Robust construction
- Suitable for hydraulic products
- Carry handle for quick and easy transport
- Equipped with locking lid, 2 controllers, 2 pressure gauges and safety valve
- Conform to ATEX
- Max. operating pressure: 4.0 bar
- Tank capacity: 10 liter, inner tank 8.5 liter stainless steel
- Air inlet joint: G 1/4" M
- Fluid output joint: 3/8" M.
- Operating temperature: 5-40 °C
- Weight: 11 kg
- Dimensions: 310x310x565mm

HALF MASK with INTERCHANGEABLE COMBINED FILTERS

FEATURES

The spectrum of action of harmful substances is large, then it is necessary identify with great precision the specific risks present in each workplace. The half mask respirators have 2 different ranges of filters that offer effective protection against dust, gases and vapors. Only wearing protective masks and their correct use can ensure an effective protection of the health against toxic substances.

- Full unobstructed field of vision
- Quick bayonet fittings
- Secure fit during use
- Large filter surfaces
- Filter in 2 versions:
 - A2P3 filter for high protection
 - AB1P2 filter for standard protection
- Built-in inhalation valves in the filter
- Low inhalation resistance

HIGH PROTECTION Combined Filters

- **Medium Capacity Organic Gas/Vapours Filter** (hydrocarbons and solvents) EN14387:2004
- **High Efficiency Particles Filter** EN143:2000

Filter Marking: A2P3

A2	(A = organic gas/vapours, bp >65°C) (2 = medium capacity)
P3	(P = particulate filter) (3 = high capacity)

STANDARD PROTECTION Combined Filters

- **Low Capacity Inorganic Gas/Vapours Filter** (hydrocarbons and solvents) EN14387:2004
- **Medium Efficiency Particles Filter** EN143:2000

Filter Marking: AB1P2

AB1	(AB = inorganic gas/vapours, bp >65°C) (1 = low capacity)
P2	(P = particulate filter) (2 = medium capacity)

AIRFED 2010 FULL FACE MASK

FEATURES

One of the biggest risks to the health of the human body is the inhalation of dust, paint mists, gases, vapors or other contaminants, which can be greatly hazardous to our health, even in small quantities. For this reason, it is of extreme importance to use masks to protect against respiratory aggressions that you can undergo during job in a saturated environment of toxic substances.

ANEST IWATA offers excellent protections to always ensure your safety in all kind of environments.

AIRFED 2010 Full Face Mask is functional and stylish. Suitable for use with previously filtered compressed air.

- Very good all-round visibility with large visor
- Head protection and comfort headband
- Visor with quick-change protection film
- Individually adjustable belt
- Easily adjustable width adjustment
- Adjustable fresh air regulator
- Activated carbon filter
- Air indicator
- 1.5m hose (inside diameter 8mm)
- Supplied in Hygiene Box

KUIK MINI GUN WASHER

IWK-H2O GUN WASHER

FEATURES & TECHNICAL

KUIK is a small, compact and unique Water and Solvent Gun Washer Machine possible to be used inside or outside spray booth and easy to be transported.

The Gun Washer has separate nozzle for cleanings inside the paint channel or outside the body with clean and dirty water and solvent, so it is possible to pre-clean with dirty water or solvent and to do the final wash with clean water or solvent. The Gun Washer has an aspiration system to avoid residual gasses remain intrapped. An air blow gun is included to dry the gun.

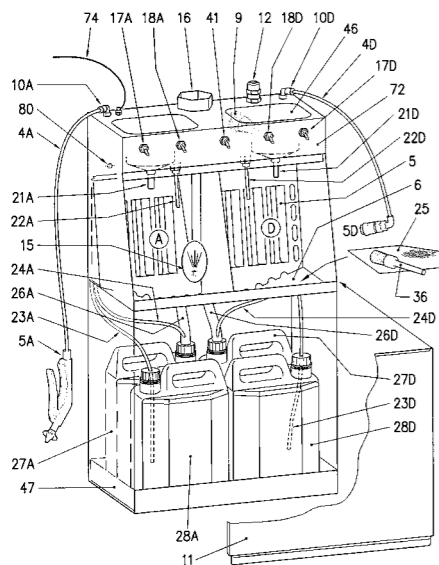

TECHNICAL

Operating pressure: 8 bar
 Tank Capacity: 5 lt.
 Dimensions: 450x250x840 mm
 Mass: 15 kg

FEATURES & TECHNICAL

IWK H2O FOR WATER BASED PAINT ONLY:

A small and cost-effective pneumatically operated machine for manually washing water-based paint from spray guns and small objects. The instruments, located on the front section, make it easy to use. The spray-washer is fitted with a small pump and sprayer which draws clean water from a container located at the bottom of the machine and a second sprayer for final washing which is connected to the company's water supply. A blowing gun then cleans and dries the guns and washed pieces.

SEPARATING THE PAINT FROM THE WATER:

The stainless steel washing tank has an internal system that mixes the dirty water with flocculating powder. The water and coagulated colour deposit are then discharged by a valve in the filter bag kit, where solid particles are separated from the water particles. The filtered water can be re-used for washing.

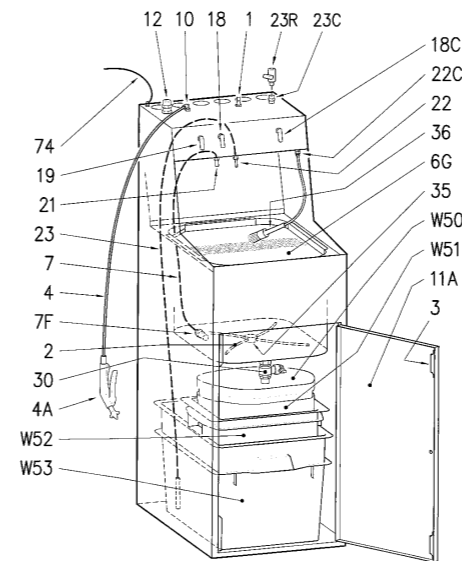

TECHNICAL

Operating pressure: 6-10 bar
 Tank Capacity: 50 lt. (Stainless Steel)
 Tank Capacity: 70 lt. (lower tank)
 Dimensions: 450x660x1335 mm
 Mass: 44 kg

MAGNETIC SUPPORTS & GUN HOLDERS

MAG STAND MAGNETIC SUPPORTS

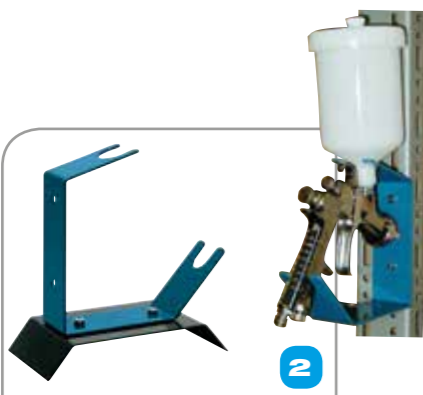

- Practical for every bodyshop, fast, flexible and reliable adhesion on all metal surfaces thanks to an extra-strong all-surface magnet.
- Hold up to 20 kg (each holder, measured on a clean metal surface).
- No cumbersome, wall mount without screws and drilling.
- Easy removal from spray both.
- Prevent potential accidents.
- Significant space savings in working area.

ORDER Information

Code	Description	Ref.
W2COM6052	MAGNETIC SPRAY GUN HOLDER (3 Spray Guns)	1

MAGNETIC SPRAY TESTER

FEATURES

Not always reflect the quality of the spray pattern of the required reference spray pattern template. Many parameters can negatively influence the quality of the spray pattern.

Variations in the quality of the spray pattern seen early and take appropriate action to remedy the quality deviations.

Test the spray pattern with the portable magnetic ANEST IWATA spray pattern tester and compare regularly compliant tabulated and efficiently the quality of the spray images.

- Portable spray pattern tester for regular monitoring of the spray pattern quality
- Fast, flexible and reliable adhesion of the spray pattern tester on all metallic surfaces thanks to an extra-strong full-surface magnet
- Adhere easy: no complicated wall mounting, no drilling, no screws
- Height of the spray pattern tester fast and customizable to each user
- Spray pattern tester lid opens downward for more freedom in the spray pattern test
- Spray pattern tester lid also adheres to all metal surfaces thanks to a further integrated magnet
- Perfect horizontal alignment by an integrated vial in the spray ruler
- Dimensions: 46 cm (B) x 75 cm (H) x 5 cm (T)

- 1 Outlet ball valves 1/4"M, with stop valve.
- 1 Outlet quick joint F.
- 1 Wall bracket with 4 mounting holes.
- 1 Saturation indicator.
- Filter body and bowl treated with anti-corrosion coated.
- Usable with 2 or 3 spray guns.

ORDER Information

Code	Description
89250222	AIR FILTER REGULATOR 1/2"F - DOUBLE-STAGE
89250051	FILTRATION CARTRIDGE 3 µ NM
89250052	FILTRATION CARTRIDGE 0,01 µ NM

TRI-STAGE

1/2" Tri -Stage

- 1 Inlet ball valve 1/2"F (allows removal of filter cartridge without stop compressor operation).
- 1 Filter 3 µ: filtration efficiency 99% with semi-automatic drain valve.
- 1 Air Regulator from 0 to 8.5 bar with pressure gauge from 0 to 10 bar.
- 1 Coalescence filter 0,01 µ: filtration efficiency 99,99% with semi-automatic drain valve.
- Active carbon filter with separation degree <3.5 particles 0,3µ/l air.
- 1 Outlet ball valves 1/4"M, with stop valve.
- 1 Outlet quick joint F.
- 1 Wall bracket with 4 mounting holes.
- 1 Saturation indicator.
- Filter body and bowl treated with anti-corrosion coated.
- Usable with 2 or 3 spray guns.

PREMIUM ANTISTATIC AIR HOSE

FEATURES

High Quality ANTISTATIC AIR HOSE with high-strength synthetic textile braid. Available in any length.

- Clamped with fittings and safety quick coupling: air hose is vented in a first step and can then be safely disconnected in the second step
- Very light, flexible in itself, noticeably handier
- Quick coupling (NW 7.2) and nipple in Nickel Plated Brass
- Conductivity: R<MOhm EN1953
- Inner diameter ø 9 mm, outer diameter ø 15 mm
- Max. operating pressure 15 bar
- Weight with standard length of 10 mt: 1,5 kg

ORDER Information

Code	Description

INFRARED UNITS

INFRARED UNITS

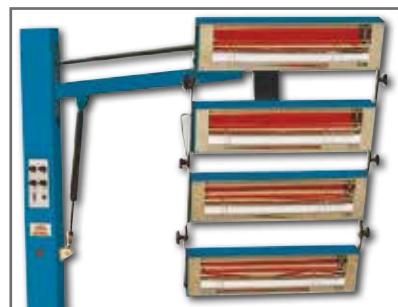

Series 1 Kw

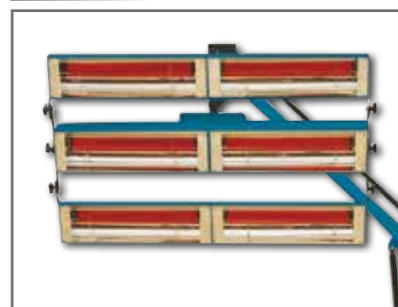

Series 3 - 4,5 Kw

Series 4 Kw

Series 6 Kw

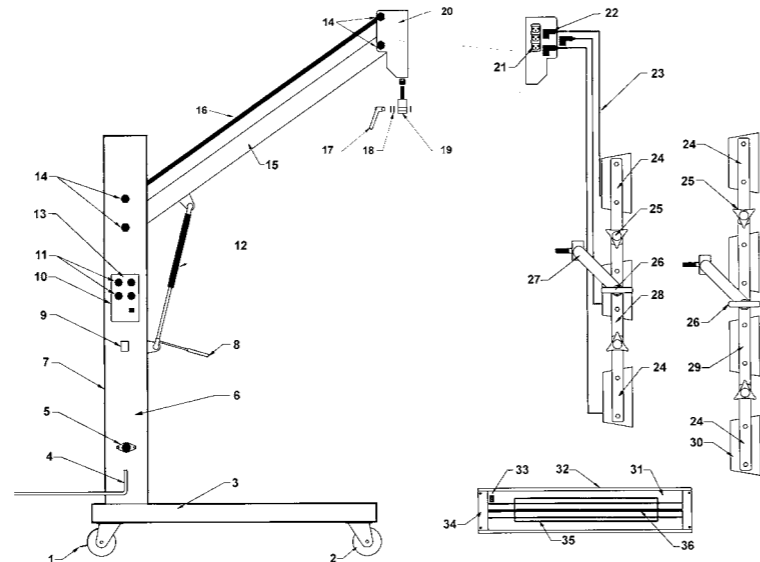

FEATURES & ORDER INFORMATION

The use of short wave infrared technology enables body fillers, primers and paints to be cured in 10 minutes as opposed to 45 minutes in an oven. ANEST IWATA infrared mobile drying systems provide a fast efficient answer for all your local body repairs.

Infrared units are a cost effective method of paint drying, and curing can be achieved in just minutes, using the highly effective short wave infrared lamp. ANEST IWATA infrared units are available in a number of options.

ADG-1B AQUADRY Paint Dryer

AI JET Flat Fan Air Nozzle Dryer

ADG-1B
Paint Dryer Gun

FEATURES

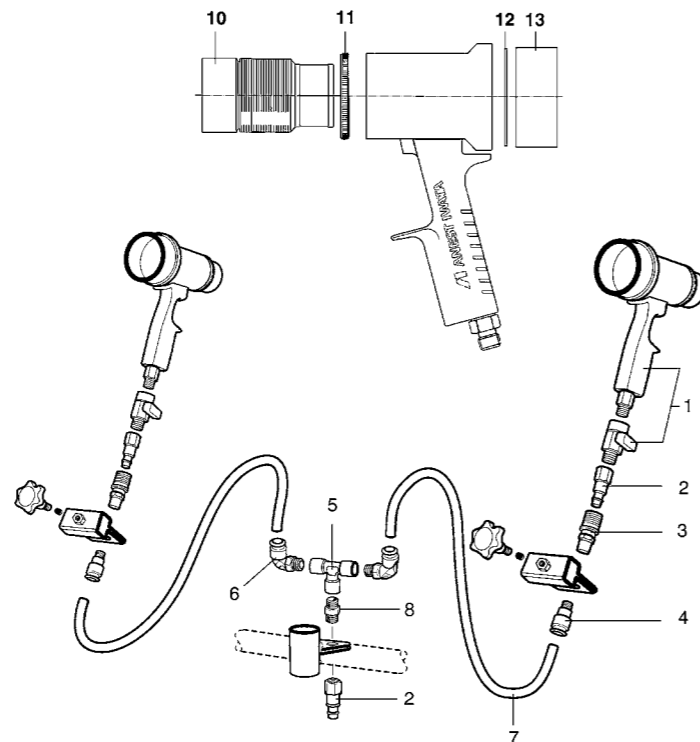

- AQUADRY Kit for the accelerated drying of water based coatings
- Guns are provided with quick couplings which allow fast disassembly
 - Air regulator included
 - Variable air flow
 - 2 Guns are easily and independently adjustable (height from 0 to 210 cm)
 - Each gun can be used independently
 - The stand has a slide and lock height adjustment.
 - Gun brackets can be moved along the length of the arm and positioned to suit, max adjustable 80 cm
 - Sturdy and dismountable steel base with rubber foot 62x62 cm
 - Venturi air entrainment increases air flow by 6:1

TECHNICAL

Max. pressure: 7 bar
Max. air consumption: 2 x 600 lt./min

AIJET

Air Nozzle

Dimensions

FEATURES

The **AI JET Flat Fan Air Nozzles** series are ideal to be used for the processes of drying and curing of water-based paints.

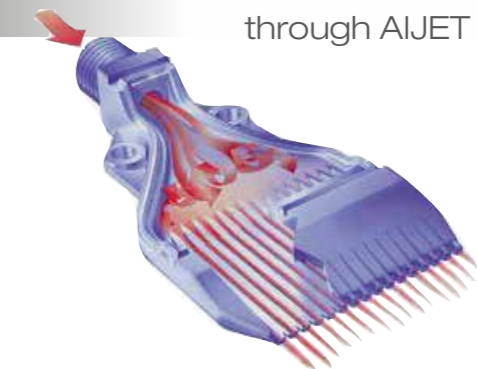

The flow of compressed air, passes through the nozzle and it is distributed through 16 holes (ø 1.5 mm), ensuring a wide range of air distribution and an excellent uniformity in the drying process.

The ergonomic design and its small dimensions, allow its use even in very small spaces.

The use of the **AI JET air nozzles** reduces the consumption of compressed air than other systems and allows the drying process in shorter times on surfaces of small and medium size, as well as a considerable reduction in noise.

AI JET is supplied with ball valve and quick coupling joint M.

Pattern of Air Distribution through AIJET Nozzle Holes

TECHNICAL

Noise Level	70 db(A) at 2 bar
Air Consumption	18 m ³ /h at 2 bar
Max. Pressure	6 bar
Max. Temperature	50°C

Needle Packing Cartridge Adjustment

WS-400 EVO, LS-400 ENTECH, W-400 Classic Plus series, W-300 WB, W-200 series.

- 1 Make sure that there is no paint residue or dust on the threads and seat surface of gun body. Clean the gun body if needed.
- 2 Hand tighten the needle packing cartridge [code 03810620] on the gun body and insert fluid needle from fluid adjustment set. If it is difficult to insert the fluid needle into the needle packing cartridge, twist the fluid needle during insertion.
- 3 Tighten the needle packing cartridge 15 - 60 degrees by using ANEST IWATA universal spanner or ANEST IWATA needle packing spanner Fig. 1.
- 4 Hold the trigger and give a small amount of ANEST IWATA grease [code W2COM6165] to fluid needle as shown in Fig. 2.
- 5 Pull and release the trigger a couple of times Fig. 3 and make sure the fluid needle moves back and forth smoothly. If not, the needle packing cartridge is too tight. Loosen the needle packing cartridge with ANEST IWATA universal spanner or ANEST IWATA needle packing spanner and repeat steps 4 and 5.

LPH-80

- 1 Make sure that there is no paint residue or dust on the threads and seat surface of gun body. Clean the gun body if needed.
- 2 Assemble as shown in Fig.1, both packings no.1 and no.2, in addition to the packing bolt.
TIP: Use the dismantled fluid needle as a guide Fig. 2.
If it is difficult to insert the fluid needle into the needle packing cartridge, twist the fluid needle during insertion.
Hand tighten the needle packing cartridge on the gun body and insert fluid needle from fluid adjustment set.
- 3 Tighten the needle packing cartridge 60 degrees by using ANEST IWATA needle packing special spanner LPH-80 (Fig. 3).
- 4 Apply ANEST IWATA grease [code W2COM6165] directly on needle packing screw when trigger lever on (Fig. 3).
- 5 Pull and release the trigger a couple of times and make sure the fluid needle moves back and forth smoothly. If not, the needle packing cartridge is too tight.

CHOICE of SPRAY GUN and USE

Spray Gun and Nozzle Choice

ANEST IWATA holds guns and nozzles recommendations from most paint manufacturers. These recommendations determines the best spray gun settings and choice of nozzles according to paints, applications and spray gun models. To find the most suitable diameter of nozzle and recommended air inlet pressure, it is advised to refer to recommendations guide showed in technical details of each product. Contact your local ANEST IWATA dealer to get information about the latest recommendations.

Atomizing Air Pressure Adjusting

- Install a pressure gauge to the air inlet pressure control of spray gun
 - Connect the gun to the supply air compressed line
- WARNING:** To supply compressed air to the gun, always use clean air, filtered through air dryer and air filter.
Fully open the pattern adjustment valve and air flow control valve.
- IMPORTANT:** The air flow control valve must not be used, except when you want to reduce the pattern width.
- Keep the trigger fully hold during setting of the adjustments.
 - Adjust pressure by the main air regulator of the spray booth, making sure that the pressure value on the pressure gauge under the gun, is correct.

Fluid Output Adjusting

The adjustment of fluid output can be left completely open and adjusted by opening and closing the trigger during painting operations.
Some paint manufacturers recommend to adjust the fluid output in base to the number of turns of the fluid adjustment knob and in these cases, these recommendations must be strictly observed.

Use of Spray Gun

The spray gun must be always held perpendicular to the surface to be paint. Every paint's passage should be done with a fluid and free motion of the arm, holding the spray gun perpendicular to the surface of the workpiece at all times.

The spray gun should move in a straight and horizontal line from right to left and back above the surface so that each passage covers the previous 50-75%. The molded parts, the edges and the interior should be painted first.

The working spray distance between the gun and the work piece is based on recommendations from the paint manufactures for each gun and nozzle set up. Traditional W400 or AZ spray guns have a recommended working distance of 130 – 200 mm. Supernova spray guns have a recommended spray distance between 130 – 300 mm, depending on paint and nozzle set up.

ANEST IWATA provides an accessory to test the quality of spray pattern, with a "Magnetic Spray Tester" that integrates all the parameters to always have the control of the best quality of spray pattern.

Safety and Protection

During painting operations always wear protective gear to avoid inflammation of eyes and skin such as safety glasses, mask, overalls, gloves etc.

ANEST IWATA provides a wide series of "Health Protection" included in the accessories section available in the Price List.

Cleaning and Maintenance

Before use, adjustment or maintenance of spray gun, it is important to read very carefully and understand the instruction manual supplied with the gun from **ANEST IWATA**.

ANEST IWATA provides all the instructions for cleaning and maintenance of spray guns, also on the front panel of Magnetic Spray Tester.

2017 SALES CONDITIONS

Validity

This product list is valid from **01.01.2017**

Transportation and Delivery

All mentioned prices are ex-works in Partille, Sweden. Transportation or delivery charges are not included in the shown price. Terms and Conditions apply to the **ANEST IWATA** Scandinavia AB.

Pricing

All prices are recommended retail prices and are exclusive of legal VAT. All prices, part numbers and images are subject to change without notice.

Minimum Invoice Value for Each Order

If the order value is less than **500 SEK** (excluding VAT) there will be an additional 50 SEK in handing fee.

Complaints

For the notice of the complaints written or by telephone please contact: **ANEST IWATA Scandinavia AB**
info@anest-iwata.se Telephone: +46 31 340 28 60
Further instructions (for example to return goods) must be agreed in advance with ANEST IWATA Scandinavia AB.

Goods Exchange Returns of Goods

The desire to exchange goods or return of goods must be notified in advance to: **ANEST IWATA Scandinavia AB**
Telephone: +46 31 340 28 60
Exchange and return are only possible if Anest Iwata Scandinavia AB has been informed accordingly.

The returned goods must be in unused, perfect condition, undamaged original packaging carried out.

Used, obsolete and unserviceable goods are generally excluded from return.

Other

Catalogues, price lists or other advertising matters of the seller are only an indication of the type of products and no prices or other information contained herein shall be binding for the seller.

ANEST IWATA Scandinavia AB does not accept any responsibility for errors or omissions contained in its price lists or promotional matters.

All prices/items/designs are subeject to be changed without previous notice.
