

MATRIX

ONE SYSTEM. ALL THE MUSCLE.

PRODUCT CATALOG

MATRIX

BORN IN THE

It was 1983 in Detroit, Michigan when a former shop owner turned entrepreneur introduced Matrix Automotive Finishes to the refinish industry; he envisioned and delivered a color rich and comprehensive system to the refinish market that would prove to solve problems and drive business in and out of the booth.

A first of its kind, the Matrix system went beyond traditional toners to include a full suite of high-performing coatings products including primers, reducers, activators and hardeners and clearcoats for every type of shop—

high production and restoration. It was the only system that you needed in your shop to get the job done—any job—and done right.

Over the years, we have continued to build on this single system and the original idea and entrepreneurial spirit of the Matrix brand with innovative products. We provided you with a full spectrum of color and special effects toners for custom work—FX Series®—and we introduced the industry's first premium solvent-based low VOC paint system (MPB-LV).

MOTOR CITY

Today, we've replaced MPB/MPB-LV with the C2C Coast 2 Coast® Intermix Color System.

Like all of the other systems before it, C2C comes with everything for the job—be it repair and refinish work, or a full restoration, but with less SKUs. We've made the initial buy-in more affordable for new shops and the cost to replace inventory more affordable for customers over the long haul.

The C2C Coast 2 Coast® Intermix Color System is everything Matrix is known for on one mix bank: color performance, coast-to-coast compliance and the industry's most competitive pricing. It's how we made our mark in the industry in 1983.

It's how we will continue to put great products at great prices in the hands of the industry's most talented painters—Mavericks of Color.

From cleaners to remove grease, wax, tar and dirt to a fisheye eliminator to an edge blender, here you'll find all of the must-have specialty products that you need to prep projects for paint, solve unwelcome problems and get you to that recognizable Matrix award-winning finish.

MP-800

SIZE: QT

PLASTIC PARTS ADHESION PROMOTER

Provides superior adhesion to plastic substrates typically used in automotive applications.

MXW-9001

SIZE: G

CLEANER/DEGREASER

Removes contaminants for initial and final surface preparation.

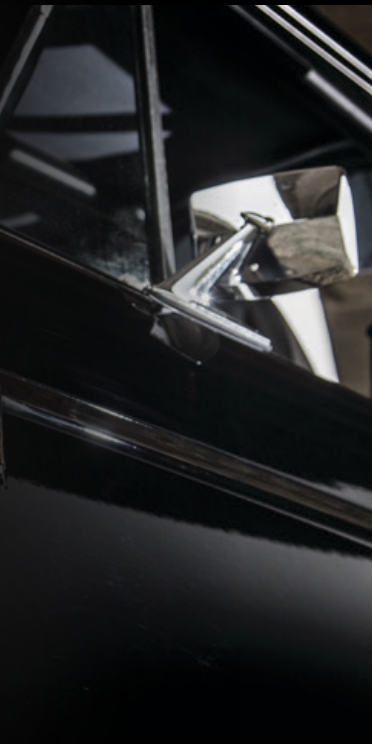

MX-01

SIZE: P

UNIVERSAL FISHEYE ELIMINATOR

Helps painters combat surface contamination in clearcoats and single stage products.

ANCILLARIES

MX-081

SIZE: P

UNIVERSAL URETHANE ACCELERATOR

Designed to reduce the cure rate of urethane paints, primers and clearcoats in cold weather conditions. When used properly this item will dramatically shorten sanding, buffing and delivery times.

MX-084

SIZE: P

ENHANCED ACCELERATOR

Formulated to reduce the cure, dust, tack and tape times of most Matrix 2K urethane clearcoat products without sacrificing pot life.

MX-840

SIZE: QT

EZ BLEND EDGE BLENDER

A ready-to-spray blending solvent used to melt the edges of single stage or clearcoat systems when spot repair procedures are performed.

MX-841

SIZE: P

FLEX ADDITIVE

A universal elastomeric additive for use in 2-component coatings where flexibility is desired.

MX-8000

SIZE: G/5G

FINAL PREP PRE-PAINT CLEANER

Removes contaminants prior to application of topcoat.

MX-85LV

SIZE: QT

FLATTENING ADDITIVE

Produces a flat, eggshell or semi-gloss appearance when a low gloss finish is needed. It is also required in certain basecoat formulas.

MX-95LV

SIZE: QT

FLATTENING ADDITIVE

Produces a flat, eggshell or semi-gloss appearance when a low gloss finish is needed. It is also required in certain basecoat formulas.

MX-9000

SIZE: G/5G

PRE-PREP WAX & GREASE REMOVER

Removes wax, grease, silicone, polish and other contaminants prior to initial preparation of repair work.

BOLD. SMART. TRAILBLAZERS.

...that's how we describe true Mavericks of Color. They're creators and risk takers in and out of the booth. They're not afraid of the unknown. They embrace any challenge because they know the reward that awaits. They push themselves creatively every day—setting the bar for all future Mavericks. They're true artists. Painters. Not applicators...not in our business...not using our system.

We have what you would call a "following," which is where this whole idea of a "Maverick" came from. It was 2016. We were looking for true brand ambassadors. Devout users that know the product line inside and out, and trust and value its position when it comes to quality, performance and color match and won't use anything else.

We turned out this campaign for the first time with none other than Ryan Evans from *History's* "Counting Cars" and Danny "the Count" Koker's Count's Kustoms garage in Las Vegas.

We couldn't think of a better Maverick to kick off the campaign. Ryan is not only the main talent behind legendary paint jobs on one of television's most popular automotive shows, he's an artist—through and through.

"A Maverick to me is any painter that can create just as many problems as they solve. Someone that doesn't get it right out of the gate, but because of their experience, they can fix it at the drop of a hat." Ryan Evans.

To stand with Ryan as a Maverick, we chose a shop owner and manager—Cody Lumpkin from Dick Lumpkin's Auto Body in Piqua, Ohio and Automotive Services Inc.'s Shane Marchyshyn in Columbus, Ohio.

While Cody and Shane aren't necessarily pin striping low-riders in Las Vegas, they are driving their business to the next level and they're doing it every day with Matrix. They're in a league of their own. Passionate. Entrepreneurial. They've got grit. They work hard. They play hard. But most important, they look to Matrix to deliver in continued quality, performance and value every day in the shop.

Ryan. Cody. Shane.

Mavericks. It's why we're one of the largest refinish brands in the industry in the North America market.

Mavericks get our story. They embrace our Motor City roots. They look to us for everything from color to clear, and they wouldn't have it any other way and neither would we. ~

"A Maverick to me is any painter that can create just as many problems as they solve. Someone that doesn't get it right out of the gate, but because of their experience, they can fix it at the drop of a hat."

- Ryan Evans

RYAN EVANS
COUNT'S KUSTOMS
2017 MAVERICK OF COLOR

From fast-drying primers for the production shop to high-build primers for the restorer, Matrix has you covered when it comes to undercoats: two-component urethanes, corrosion-resistant epoxies, and adhesion promoters and sealers. All undercoats are available in a variety of colors and with compatible Matrix reducers and accelerators.

2KPB

SIZE: G

2K HIGH PERFORMANCE PRIMER - BUFF

A medium-build primer/surfacer that provides excellent topcoat hold-out, minimal shrinkage and easy sanding properties.

MIX RATIO: 4 : 1

CATALYST: 2KPA

MP-121

SIZE: QT/G

2K PRIMER/SEALER - WHITE

An AccuShade® sealer designed for “wet-on-wet” applications; recognized for excellent flow, leveling and topcoat holdout in addition to offering medium film build for filling minor surface imperfections.

MIX RATIO: 4 : 1

CATALYST: MAV-420 | MBR-100 | MBR-200 | MBR-300 | MBR-400

MP-124

SIZE: QT/G

2K PRIMER /SEALER - GREY

An AccuShade® sealer designed for “wet-on-wet” applications; recognized for excellent flow, leveling and topcoat holdout in addition to offering medium film build for filling minor surface imperfections.

MIX RATIO: 4 : 1

CATALYST: MAV-420 | MBR-100 | MBR-200 | MBR-300 | MBR-400

MP-127

SIZE: QT/G

2K PRIMER/SEALER - DARK GREY

An AccuShade® sealer designed for “wet-on-wet” applications; recognized for excellent flow, leveling and topcoat holdout in addition to offering medium film build for filling minor surface imperfections.

MIX RATIO: 4 : 1

CATALYST: MAV-420 | MBR-100 | MBR-200 | MBR-300 | MBR-400

MP-200

SIZE: QT/G

DIRECT-TO-METAL PRIMER

A high-build premium DTM primer surfacer that is fast drying and easy-to-sand, as well as offers excellent adhesion and corrosion resistance.

MIX RATIO: 4 : 1

CATALYST: MA-200

MP-210

SIZE: QT/G

DIRECT-TO-METAL SEALER

A premium DTM sealer offering smooth application over a wide range of conditions as well as excellent adhesion and corrosion resistance.

MIX RATIO: 4 : 1 CATALYST: MA-200

MP-480

SIZE: QT/G

EPOXY PRIMER - GREY

Provides maximum corrosion protection and adhesion to bare metal surfaces; use sanded or as a sealer for medium-build.

MIX RATIO: 4 : 1 CATALYST: MAV-420

MP-220

SIZE: QT/G

DIRECT-TO-METAL PRIMER - GREY

A 2.1 VOC DTM non-isocyanate primer that can be used as a high-build primer surfacer; it is fast drying and is easy-to-sand plus corrosion resistant and offers excellent adhesion.

MIX RATIO: 4 : 1 CATALYST: MA-200

MP-550

SIZE: QT

SELF ETCHING PRIMER - ROSE

A premium quality two-part self etching primer designed to inhibit corrosion and increase adhesion to bare metal substrates; can be directly top-coated with any Matrix topcoats.

MIX RATIO: 1 : 1 CATALYST: MA-505

MP-2KGR

SIZE: QT/G

QUICK SAND 2K PRIMER SURFACER - GREY

A medium-build production-style urethane primer surfacer that is easy-to-sand and offers excellent build.

MIX RATIO: 4 : 1 CATALYST: MA-2K

MP-600

SIZE: QT

SELF ETCHING WASH PRIMER

A two-part self etching primer designed to inhibit corrosion and increase adhesion to bare metal substrates.

MIX RATIO: 1 : 1 CATALYST: MA-600

MP3-HS

SIZE: QT/G

ULTRA HIGH BUILD 2K PRIMER

A two-component, high-build primer surfacer that is easy-to-use with good sanding properties and provides the desired film-build in fewer coats to improve productivity.

MIX RATIO: 4 : 1 CATALYST: MA3-HS

MP-800

SIZE: QT

PLASTIC PARTS ADHESION PROMOTER

Formulated to provide superior adhesion to plastic substrates typically used in automotive applications. [Ready-to-spray]

MP4-2K

SIZE: QT/G

LIGHTNING PRIMER SURFACER - GREY

An isocyanate free 2K technology designed for production-oriented shops delivering excellent corrosion protection and adhesion on small repairs or for bare metal areas where sand-throughs occur.

MIX RATIO: 4 : 1 CATALYST: MA4-2K

MP-900

SIZE: QT/G

EPOXY PRIMER - BLACK

Provides maximum corrosion protection and adhesion to bare metal surfaces; use sanded or as a sealer for medium-build.

MIX RATIO: 4 : 1 CATALYST: MAV-420

MP-450

SIZE: QT/G

EPOXY PRIMER - WHITE

Provides maximum corrosion protection and adhesion to bare metal surfaces; use sanded or as a sealer for medium-build.

MIX RATIO: 4 : 1 CATALYST: MAV-420

BASECOAT SYSTEM

ONE MIX BANK. ONE SYSTEM. THREE SOLUTIONS.

We took our basecoat program to the next level by offering three performance-grade options: **Good, Better and Best**. This universal, three-tiered system not only removes the complexity from basecoat selection but it gives you the flexibility to choose the right one for the job. And you are not sacrificing when it comes to blendable color, match and hiding because Good, Better and Best basecoats deliver results. Available in National Rule and low VOC.

GOOD: RB & RB-LV

SIZE: P/QT/G

For repair and restoration work where performance is as critical as price.

MIX RATIO: 1 : 1

CATALYST: (NATIONAL RULE) RSR-300 | RSR-301 | RSR-302
(LOW VOC) MBR-100 | MBR-200 | MBR-300 | MBR-400

BETTER: MB & MB-LV

SIZE: P/QT/G

Offers blendable color match and superior hiding; great for spot, panel and overall repair work as well as full restorations.

MIX RATIO: 1 : 1

CATALYST: (NATIONAL RULE) MR-0860 | MR-0870 | MR-0885 | MR-0895 | MR-0898
(LOW VOC) MBR-100 | MBR-200 | MBR-300 | MBR-400
(OPTIONAL) MIX 5% MX-57 TO READY-TO-SPRAY COLOR

BASECOAT SYSTEM

BEST: MPB & MPB-LV

SIZE: P/QT/G

Production and performance driven basecoat solution; designed for an advanced refinishing system delivering spot-on color match and exceptional hiding 24/7. Use for spot, panel and multi-panel repair work, as well as overall, restoration and custom projects.

MIX RATIO: 1 : 1

CATALYST: (NATIONAL RULE) MR-0860 | MR-0870 | MR-0885 | MR-0895 | MR-0898
(LOW VOC) MBR-100 | MBR-200 | MBR-300 | MBR-400
(OPTIONAL) MIX 5% MX-57 TO READY-TO-SPRAY COLOR

COMPLIANT. NO MATTER THE LOCATION.

Toners

While we were careful to limit toner SKUs to make the system more manageable and cost-effective for you, we purposely stacked it with our most popular colors and the ones that you'll rely on every day—26 total.

2018

MAVERICKS OF COLOR

There are so many of you 'Mavericks' out there and it's not hard to find you because everyone knows you, looks up to you, talks about you, shares your stories and your work. So it should be no surprise that Justin Nichols, Gary Zaborowski and Joe Vincent are our new Mavericks of Color for 2018.

Like Ryan, Cody and Shane, they're masters at their craft but always fine-tuning their skills. Leaders but willing to follow when they can learn and grow. Authorities in color—especially candies— and anything custom that someone once said "it can't be done." They're setting trends and breaking

them and they're doing it with Matrix in their hand.

Mavericks. One hundred and ten percent painters—artists with a spray gun or a brush. They're not just slingin' paint...not in our business...not using our system.

A U.S. Army veteran with 15 years of service, Joe Vincent is a true American hero and now a celebrated Maverick of Color. A well-known figure in custom with a following that equals that of Matrix, he's been painting cars, bikes and everything in between for nearly 20 years and creating some of the industry's most unique and recognized work. You can see his masterpieces on Facebook and Instagram @vincentdeziens.

JUSTIN NICHOLS

He built his first hot rod at the age of seven with his dad—a Maverick in the making at an early age. It was a 1931 Ford pickup topped with what Justin describes as “grasshopper” green. It’s one of those builds that stays in the family; Justin’s son will someday be behind the wheel of that father son build. Justin’s dad only recently passed away; however, he remains a driving force—an inspiration—in his son’s life and business as the work of Nichols Paint & Fabrication, a now big-time custom shop in the small town of Watseka, Illinois debuts at THE SEMA SHOW 2017 with not one, but two feature builds and his son steps into the role of “Maverick of Color”.

Model cars became real-life custom builds for Gary “Boogie Man” Zaborowski. This Maverick truly takes us back to our roots—Detroit, where Matrix was founded and introduced to refinishers more than 30 years ago. Today, in the Motor City, Boogie Man brings old cars back to life for close friends and now referrals since retiring from General Motors. From a 1940s Willy to a Ford Coupe, Boogie Man is *the* man in this city for custom cars—although the name isn’t related to his craft at all, but to his moves on the dance floor. Now, a Maverick he is recognized for his unique skill and unprecedented passion for what he does best and that’s candies.

GARY ZABOROWSKI

We support our clearcoat program with a wide range of specially-formulated activators and hardeners for use in spot and panel work, as well as total repairs. In keeping inventory tight and cost-controlled—because we understand your business—many of our clearcoats utilize the same activator.

TOPCOAT/CLEARCOAT: MS-42 Premium High-Solids Clearcoat

1957 CHEVROLET BEL AIR

It has been said that Matrix makes 'one hell of a clearcoat' and we couldn't agree more. Our clearcoats vary in build and gloss level, but in the end, each and every one outperforms and outranks the competition for everything from ease-of-application to overall durability, UV protection and shine.

AG-40

SIZE: 5L

AUTOGLAS® EURO DESIGN CLEARCOAT

A premium high-solids European-style clearcoat that provides optimum flow and leveling in an easy-to-apply 2 : 1 mix that can be air or force dried.

MIX RATIO: 2 : 1

CATALYST: AH-401 | AH-402 | AH-403 | AH-404

AG-40LV

SIZE: 5L

AUTOGLAS® 2.1 VOC EURO DESIGN CLEARCOAT

A premium high-solids European-style clearcoat that provides optimum flow and leveling in an easy-to-apply 2 : 1 mix that can be air or force dried.

MIX RATIO: 2 : 1

CATALYST: AH-201 | AH-202 | AH-203

MS-15

SIZE: QT/G

QUICK CURE CLEARCOAT

Intended for small, quick repairs over a wide temperature range—jobs can be polished and delivered same day without the need for baking.

MIX RATIO: 4 : 1

CATALYST: MH-15

MS-20

SIZE: G

HIGH PERFORMANCE CLEARCOAT

An easy-to-spray clearcoat that results in a durable final finish—a productive and versatile choice for automotive refinishing.

MIX RATIO: 2 : 1

Pinstripes, candies, metal flakes and everything “custom” in between can be found in the FX Series® line. Choose from Mystical, Brilliant and a collection of toners and dyes for additional special effects that turn heads; color variety and intensity is not lacking. FX Series paint can be subtle or FX Series paint can be over-the-top.
